## Selected Readings

Almost all items in this list are held in the TUAN library, which is the world's largest collection of materials on urban agriculture. Over 3,000 accessions of this material have recently been entered into a database, accessible through TUAN. Please note that where an entire edited book or the special issue of a periodical is related to the subject of urban agriculture, individual articles within those publications are not listed separately. Note also that publications in languages other than English are not equally represented in this list.

This list is not meant to be fully comprehensive of the growing literature on urban agriculture. Additional titles can be located, among others, on the Internet at [www.idrc.ca/cfp](http://www.idrc.ca/cfp), [www.ruaf.org](http://www.ruaf.org), and [www.cityfarmer.org](http://www.cityfarmer.org). Numerous reports are increasingly published electronically. Here, we have purposely de-emphasized such material, focusing instead on the most important as well as the more obscure printed publications.

Collections of papers (particularly special issues and sections of journals) are included at the end of this list.
